Covid Data Exploration

This project is about analyzing Covid19 dataset from Feb 4 2020 to Oct 16 2022

Analyzed Covid19 dataset to find out its impact on World.
Built visualizations to show the regions that are affected by Covid

Tools Used: Microsoft Excel, SQL Server, Tableau

DataSet used : Our World In Data
https://ourworldindata.org/covid-deaths

Steps
- Calculated Global Numbers of Total cases, Total Deaths, Death percentage.
- Build a Map in Tableau public showing Percent of population infected per country. It clearly shows the darker area has more Covid19 infection.
- Built a bar chart showing Total death count per Continent. Europe has the highest death count.
- Built line chart showing monthly percent of population infected by Covid19. Also included list to select Country of interest.
